SUMMARY

B.Tech ECE student graduating 2027 (CGPA 7.69, no backlogs) with hands-on experience shipping production backend systems in Java and Python. Designed and deployed 2 live applications — [gramflix.in](#) and [growthaffinitymarketing.com](#) — using microservices architecture, REST APIs, JWT security, and AWS cloud infrastructure. Strong fundamentals in DSA, OOP, LLD/HLD, and system design. Comfortable across the full stack with a focus on backend engineering and scalable distributed systems.

TECHNICAL SKILLS

Backend: Java, Spring Boot, Spring Security (JWT/RBAC), Spring Data JPA, Hibernate, Maven, Python, FastAPI, Node.js

CS Fundamentals: DSA, OOP, SOLID Principles, Design Patterns, LLD, HLD, Microservices, REST API Design, System Design

AI/ML: OpenCV, face_recognition (Dlib), scikit-learn, PyTorch, NumPy, Pandas | **Mobile / Frontend:** React Native (Expo), React, Next.js, TypeScript, Tailwind CSS

Database: PostgreSQL, MongoDB, Redis, Supabase | **DevOps:** AWS (EC2, RDS, IAM, S3), Docker, GitHub Actions (CI/CD), Git, Linux

EXPERIENCE

Freelance Backend & Full-Stack Developer — Remote, Self-Employed

Jan 2025 – Nov 2025

- Architected and shipped **2 live production applications** ([gramflix.in](#), [growthaffinitymarketing.com](#)) end-to-end — designed microservices-based backends in Java/Spring Boot with JWT/RBAC auth, API Gateway routing, and REST APIs consumed by real users
- Built **scalable distributed systems** applying LLD and HLD principles — Redis in-memory caching, service decomposition, PostgreSQL/MongoDB schema design, and inter-service REST communication optimised for reliability and throughput
- Integrated **Python AI/ML microservices** with Java backends via REST — deployed ML inference services on AWS with structured logging, error handling, and performance monitoring across the full production stack
- Owned the **complete SDLC** — database design, feature development, unit testing, Docker containerisation, CI/CD pipelines via GitHub Actions, and AWS EC2 deployment with zero-downtime releases

DevOps Intern — Youth Dreamers Foundation (YDF), Remote [\[Certificate ↗\]](#)

Feb 2025 – May 2025

- Configured and maintained **AWS cloud infrastructure (EC2, RDS, IAM)** with Docker containerisation — contributed to CI/CD automation, backend service deployment, and production reliability under senior engineering mentorship

PROJECTS

Smart Attendance System | Java · Spring Boot · React Native · FastAPI · PostgreSQL (Supabase) · JWT | [GitHub ↗](#)

- Designed a **3-tier microservice architecture** — React Native mobile app captures classroom photo → Spring Boot REST API handles JWT auth, student CRUD, and image compression → Python/FastAPI ML service runs face detection and recognition → PostgreSQL (Supabase) stores embeddings and attendance records
- Implemented **One-Shot Learning face recognition** using 128-dimensional Dlib encodings with Euclidean distance matching (threshold 0.6) and in-memory caching — auto-marks multiple students present/absent from a single image with confidence-based filtering
- Exposed **6 production REST endpoints** covering auth, student management, automated attendance, and daily analytics — with image optimisation (max 800px, 70% quality) to reduce payload size and improve API response time

GrowthAffinity — Live SaaS Platform | Node.js · React · PostgreSQL · Redis · Docker · AWS | [Live ↗](#) | [GitHub ↗](#)

- Built and deployed a **microservices-based SaaS application** with independently deployable services, API Gateway for unified routing, Redis caching layer, and PostgreSQL — applied HLD patterns (service decomposition, load balancing strategy) and LLD practices (SOLID, design patterns) throughout
- Containerised all services with Docker and shipped to **AWS EC2 via CI/CD pipelines** (GitHub Actions) — currently live at [growthaffinitymarketing.com](#) serving real users with production-grade uptime and monitoring

GramFlix — Live Java Backend | Java · Spring Boot · MongoDB · Redis · Next.js · AWS | [gramflix.in ↗](#) | [GitHub ↗](#)

- Engineered a **production Java backend** with Spring Boot microservices, API Gateway, JWT role-based access control, rate-limiting middleware, and Redis in-memory caching — live at [gramflix.in](#) with AWS EC2 deployment, MongoDB for scalable storage, and CI/CD automation

EDUCATION

B.Tech — Electronics & Communication Engineering · JIS College of Engineering, Kolkata

Graduating 2027 | CGPA: 7.69/10

Class XII · Patna Muslim H/S +2, Patna

2021–2023 | 75.8%

Class X · Swami Vivekananda H/S, Patna

2020–2021 | 75.2%

ACHIEVEMENTS & CERTIFICATIONS

- 300+ DSA problems** solved on [LeetCode ↗](#) — consistent practice in arrays, trees, graphs, dynamic programming, and binary search in Java and Python
- JPMorgan Chase — Software Engineering Job Simulation (Forage) ↗** — Completed practical tasks in Kafka Integration, REST API Integration, H2 Integration, and REST API Controller (Oct 2025)
- NPTEL: Programming in Java — Elite (87%) ↗** — National-level Elite certification; top performance in Java, OOP, and software design fundamentals
- AI/ML Virtual Internship — EduSkill ↗** — Hands-on ML engineering and computer vision workflows; applied directly in Smart Attendance System
- 3x Hackathon Participant including [Adobe Hackathon ↗](#) — rapid prototype & feature delivery under pressure in cross-functional team.
